May 2023 — June 2023

Created and implemented components using React.js for user interface and learned about the firebase for efficient storage of data in backend.

PROJECTS

Competetions Identifier (On-going), Coimbatore

This project is a dynamic web application built using React.js that serves as a competition identifier platform, allowing users to effortlessly discover and track various competitions across different categories.The tech stack also includes *Firebase* for real time data, *Node.js and Python* for robust backend.

Expense Tracking Application, Coimbatore
January 2024 — February 2024

Developed a dynamic expense tracking application using React.js for the frontend and Spring Boot for the backend. Implemented features such as user authentication, expense logging, and reporting functionalities. Utilized RESTful APIs to handle data communication between the frontend and backend.Leveraged modern development tools and best practices to deliver a robust and user-friendly application.

ChatGPT for Supportability, Coimbatore

Designed and developed a chatbot project using React.js for the frontend and integrated ChatGPT API for intelligent conversational capabilities. Also trained the chatbot for specific usecase i.e. as SAP organisation's personal chatbot.
